LOCKWOOD BECK RESERVOIR

Working in your area to safeguard water supplies for future generations

Work Description

Together with our supply partner Interserve we plan to carry out essential ground works maintenance, investigation and improvements to Lockwood Beck Reservoir, starting in September and lasting for around 10 weeks. These works are needed to ensure the resilience and efficiency of the Reservoir. We will be carrying out ground work and excavation to the area on the north shore. During the work, access to this shoreline will be restricted, however we will endeavour to keep disruption to a minimum. There will be temporary traffic lights on the A171 during periods when we have large vehicles accessing the site.

Lockwood Beck: Essential Ground Works Maintenance
